PublicSchoolWORKS' EmployeeSafe Suite Wins Fifth Consecutive District Administration Readers' Choice Top 100 Products Award

Web-based risk management suite saves schools time, improves safety compliance

Cincinnati, OH – December 2, 2013 – PublicSchoolWORKS, the signature safety solution for schools, again received District Administration Magazine's (DA) Readers' Choice Top 100 Products award for its EmployeeSafe Suite. This web-based software suite manages school safety programs for compliance with regulatory requirements associated with training, safety tasks such as drills or inspections, chemical safety, and a complete safety data sheet (SDS) solution to create a comprehensive school safety program. The EmployeeSafe Suite ensures that school districts are in compliance with ever-changing district, state and federal mandates while reducing the time and effort typically required of administration.

This is the fifth consecutive year the EmployeeSafe Suite was named a DA Readers' Choice Top 100 Product and the sixth such award PublicSchoolWORKS has received. The Student Bullying Reporting and Student Safety Reporting Systems by PublicSchoolWORKS also were awarded the EdTech Digest Cool Tools Award for the Best Reporting Solution. Additionally, Carrie Mockler, PublicSchoolWORKS director of client services, was selected as a 2013 Silver Stevie® Award recipient in two categories: Female Executive of the Year for Business Services with 11 to 2,500 employees and Woman of the Year for Business Services.

"Administrators need more than just technology to improve processes and make their jobs easier – they need technology that is built to address the unique challenges facing public schools and the support that takes the load off administrators," said Tom Strasburger, PublicSchoolWORKS vice president. "The fact that the EmployeeSafe Suite has achieved the Top 100 distinction for five years straight demonstrates that PublicSchoolWORKS ensures districts are promoting safety while achieving the results they need."

Recipient of the 2010 Readers' Choice
Top 100 Products for both
EmployeeSafe and StudentWatch

The backbone of the EmployeeSafe Suite is its unparalleled system that automates, manages and sustains a comprehensive safety program while ensuring proper reporting, so school districts meet requirements with ease. Administrators no longer have to worry about manually tracking, training or other requirements, much less managing paperwork or maintaining spreadsheets to track and report. All requirements are managed to completion by the user-friendly, web-based EmployeeSafe Suite.

With all records now housed in one place and available from any location, administrators effortlessly can pull non-compliance reports when necessary. Since non-compliance reports automatically are emailed to key administrators when staff and vendors do not complete district requirements, administrators simply follow up with only those that have not yet completed the requirements, and have more time to focus on managing their district's overall business.

The PublicSchoolWORKS multi-tiered "set it and forget it" systems were developed by former educators to improve school safety, while reducing administrators' time and effort needed to run an effective, comprehensive safety program. For more information on how PublicSchoolWORKS can improve districts' safety programs, contact **1-877-779-6757** or sales@publicschoolworks.com.

About PublicSchoolWORKS

Since its founding in 2000, PublicSchoolWORKS has been committed to providing top-quality, practical and cost-effective solutions to the constantly changing environmental, health and safety requirements affecting the nation's educational systems. The company has gained an exemplary reputation for the innovation and technical superiority of its comprehensive and integrated safety and compliance management systems, which combine administrative software tools and resources to dramatically reduce the time and cost required to develop, implement, and sustain safety compliance programs.
